

PULA / RAIN OBJECTS

BOTSWANA INDEPENDENCE COLLECTION - BOIPUSO 60 - 1966-2026

PRODUCTION / TECH PACK - VERSION 1

Approved vocabulary: PULA / A ENE!! / FATSHE LENO / BOIPUSO 60 / 1966-2026 / INDEPENDENCE LIVES ON.

Important: All mockups in this pack are visual references only. Do not trace or reproduce AI artifacts, filler copy, distorted lettering, or unintended marks. Final production artwork must be rebuilt as clean vector separations and approved before printing.

1. COLLECTION FREEZE & DESIGN SYSTEM

Core palette	Washed black / pepper, washed navy, ivory; Botswana light blue + black + white details.
Primary rain language	Very thin, thread-like, mostly vertical lines. Asymmetric clusters. Vary lengths and spacing. Never broad diagonal stripes.
Rain placement	One-sided / shoulder-led placement with generous negative space. Selected styles may carry rain from front shoulder to back or down one side.
Tactile finish	Large PULA: 3D puff or high-density raised print. Fine rain: flat/HD or raised cord only where technically safe.
Reflective	Use selectively on individual rain threads only. Matte/subtle in daylight; bright under direct flash/headlights. Do not make every line reflective.
Brand details	Small matte-black PULA side tab and/or small Botswana flag detail where specified.
Typography	Clean modern sans serif; preserve exact approved words. No substitute slogans.

Blank preference: Comfort Colors 1717 or manufacturer-approved comparable premium heavyweight garment-dyed unisex tee. Preferred colors: Pepper/Black, Washed Navy, Ivory.

2. HERO TEE - SIDE PULA / FATSHE LENO

FRONT

Vertical P U L A placed toward one side of body, large raised blue lettering. Small handwritten-style A ene!! below. Front remains clean: no droplets or rain over the PULA treatment. Optional small Botswana flag / PULA tab near hem.

BACK

1966
INDEPENDENCE LIVES ON
thin Botswana-blue divider
FATSHE LENO

Rain cluster falls down one back side only, beginning around shoulder. Keep center/back field open.

TECHNIQUE

PULA: 3D puff / high density.
Back text: fine flat screen print or HD where legible.
Rain: thin blue/black/white threads; selective authentic reflective ink on only some lines.

DO NOT

Do not print PEOPLE / LAND / OPPORTUNITY. Do not add generic filler copy. Do not thicken the rain into bars. Do not add a map or coordinates to this hero style.

3. ADDITIONAL TEE STYLES

FATSHE LENO - centered	FATSHE LENO centered/small + one-sided rain	A ENE!! + one-sided rain	Black/pepper. Minimal, heritage-led.
FATSHE LENO - side	FATSHE LENO running vertically down side seam area + rain concentrated opposite/shoulder side	PULA. / restrained rain continuation	Ivory version shown in reference. Treat as distinct variant, not a replacement for centered tee.
Rain Line	Vertical PULA + A ene!! with one-sided rain	One-sided rain continuation	Washed navy; subtle everyday option.
Coordinates	Vertical PULA + A ene!! + coordinates	PULA + droplet / restrained back	No Botswana map on the same design. Coordinates must be verified before production.
After Rain	Small PULA centered with subtle tonal rain field	A ENE!!	Boxy/cropped visual direction; subtle, tonal.

4. HEADWEAR & WINTER RAIN JACKET

Rain Bucket Hat	Navy/black base. Fine rain lines on one side. Underside reveal in Botswana blue with A ENE!!; tiny droplet accents optional. Avoid over-decoration.
Rain Beanie	Black/navy/ivory options. Fine vertical rain distributed asymmetrically. Small PULA tab. Selected reflective threads for low-light reveal.
Winter Rain Jacket	Navy technical jacket. Rain concentrated on one front shoulder/side; reflective threads selected only. Back remains clean with small A ENE!!; small PULA tab near hem.

5. CELEBRATION OBJECTS - ACCESSORY CAPSULE

Priority for first physical run: Beverage can cooler, raindrop keyring, commemorative pin. Coasters, magnetic photo frame and mouse mat may run concurrently if supplier lead time does not jeopardize the event deadline.

Can cooler	PULA. / A ENE!! / BOIPUSO 60 / 1966-2026 + one-sided rain
Raindrop keyring	Raindrop silhouette; PULA. on one face; BOIPUSO 60 / 1966-2026 on reverse
Commemorative pin	BOIPUSO 60 / 1966-2026; dark navy/black field; restrained rain
Coaster pair	PULA. + rain / A ENE!! + rain

Magnetic photo frame	PULA. + BOIPUSO 60 / 1966-2026; photo-strip format
Mouse mat	PULA. lower corner; rain along one side; no generic slogan

6. PRINT SEPARATION & QUALITY REQUIREMENTS

Layer 1 - Raised typography: PULA only where specified. Manufacturer to recommend puff vs high-density based on edge sharpness and durability.

Layer 2 - Standard fine text: 1966, INDEPENDENCE LIVES ON, FATSHE LENO, coordinates, and other small copy. Maintain legibility; do not puff microtext.

Layer 3 - Matte rain: thin blue / black / white threads. Preserve irregular spacing, varying length, and one-sided asymmetry.

Layer 4 - Reflective rain: only selected threads. Quote authentic 3M reflective if available and state exact reflective product/ink system.

Strike-off required: photograph in normal daylight and under direct flash/headlights. Also provide close-up of raised print and fine rain.

Durability: confirm curing method and wash-care requirements. Production approval should follow a physical strike-off or equivalent sample whenever schedule allows.

Artwork rebuild: supplier must work from clean vector files (AI/EPS/PDF/SVG as requested), not raster screenshots. All final spelling and placement to be approved by Gao before bulk run.

RAIN DETAIL - TARGET APPEARANCE

7. MANUFACTURER RFQ / APPROVAL CHECKLIST

1. Quote 50 and 100 units per tee style; state minimums for specialty print.
2. Confirm Comfort Colors 1717 availability in Pepper/Black, Washed Navy and Ivory, or propose a premium comparable blank.
3. Confirm ability to combine 3D puff/high-density typography + fine rain + selective reflective print on the same garment.
4. State whether reflective ink/material is authentic 3M; identify product if possible.
5. Provide fastest production turnaround after artwork approval and blank receipt.
6. Provide rush fee and shipping cost to Minnesota.
7. State latest artwork-approval date that still meets required delivery.
8. Confirm physical strike-off/sample availability, price and timing.
9. Advise minimum printable line weight for rain and minimum type size for fine copy.
10. Confirm whether rain can cross seams/shoulders cleanly and any registration limitations.
11. Provide wash/cure specifications and expected durability.
12. Do not substitute copy or add decorative elements without written approval.

Requested delivery: Minnesota, USA. This is a rush Independence collection; supplier must state realistic delivery date in writing before order placement.

8. VISUAL REFERENCE GALLERY - DOC 2 / SUPPORTING BOARDS

These boards preserve the design intent and product family. They are supporting references, not final separations. Where a board conflicts with the written specifications in Sections 1-7, the written specification controls.
