

EWAH

BUCKET HAT + RONE CEREMONY PROJECT

MASTER HANDOFF FOR CLAUDE

Concept architecture, locked decisions, visual references, manufacturing logic, and next steps

Prepared for Gao | EWAH

August 2026

1. Executive summary

What this project became and what must be preserved

Gao began with a clear personal truth: she wears bucket hats often, but the hats she owns are ordinary. EWAH should not enter this category with a blank hat and a logo. The category must carry the same design intelligence as the apparel: sculpted architecture, controlled softness, movement, modesty, fit, and recognizable luxury.

The work expanded into three connected opportunities: a five-style EWAH bucket-hat family, a Muslim-head-cover-inspired modest-performance capsule, and a Botswana-rooted ceremonial category now moving toward the name RONE by EWAH.

THE CENTRAL PRINCIPLE

- Build from Gao's genuine wearing preferences, not from increasingly theatrical AI silhouettes.
- Use the emblem-brooch as identity and functional hardware.
- Create one validated master block, then derive lifestyle, performance, modest, and ceremonial variants.
- Treat AI boards as concept communication, never as production-ready construction.

2. Evidence from Gao's real hats

The body, face, hair, glasses, and real-life use case are the starting point

The real photographs establish the preferred silhouette more credibly than any rendering: medium crown, softly downward brim, useful sun coverage, quiet structure, compatibility with large sunglasses, and versatility across gym, travel, resort, and everyday clothing.

Reference 1 - soft black everyday bucket hat

Reference 2 - tan layered-band hat, front styling

Reference 3 - tan layered-band hat, direct front

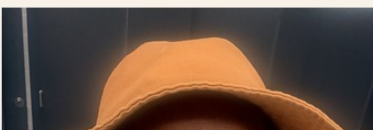

Reference 4 - tan hat, rear proportion and coverage

Reference 5 - black athletic bucket with gym outfit

Reference 6 - black athletic bucket, full-body context

Reference evidence: Gao's existing black athletic/everyday buckets and the preferred tan layered-band hat.

The tan layered-band hat is the strongest base proportion. It should guide EWAH Hat Block 01: a medium-depth crown, gently downward brim, soft reinforcement, and enough coverage without becoming floppy or oversized.

3. Locked collection architecture

Later experiments add to the system; they do not erase the original styles

FAMILY	CONCEPT	ROLE
CORE	Sculpt Bucket	Clean architectural everyday foundation.
CORE	Mesh Flow	Perforated summer and performance expression.
CORE	Wrap Flow	Soft, feminine wrap detail; lifestyle elegance.
CORE	Pleat Motion	Pleated architectural brim; fashion-performance.
CORE	Slit Motion	Original controlled slit design; keep clean version.
MODEST	Noor Lite	Light training, walking, mobility, travel.
MODEST	Noor Lock	High-movement secure training version.
MODEST	Noor Shade	Travel and outdoor sun-shield version.
MODEST	Noor Sculpt Wrap	Sculptural, pleated modest statement.
DERIVED	Layered Safari	Lifestyle evolution of approved tan block.
DERIVED	Air Sculpt	Performance evolution of approved block.
CEREMONY	RONE Reverence	Black funeral/memorial short-drape one-piece.
CEREMONY	RONE Sunday	Church expression in restrained colors.
CEREMONY	RONE Heritage	Traditional ceremonies and group fabrics.

4. Emblem-brooch: the shared signature

Brand identity becomes useful hardware

The brooch is one of the strongest ideas in the project. It should be treated as a custom metal trim with a technical purpose, not as a promotional pin.

- Identity: a recognizable EWAH code across hats, wraps, apparel, and outer layers.
- Function: anchors side drapes, wrap panels, back gathers, or modular attachments.
- Transformation: removable on lifestyle and ceremonial pieces; fixed or riveted on performance pieces.
- Working size: approximately 22-28 mm, to be tested against the actual crown and wearer.
- Primary finish: brushed antique gold; alternates are blackened gunmetal and antique pewter.

Hardware must have rounded edges, low snag risk, secure closure, corrosion resistance, and premium weight.

5. RONE by EWAH

A Botswana-rooted ceremonial category

RONE is Gao's preferred working name for the Botswana ceremonial extension, derived conceptually from korone / crown. The name story, pronunciation, legal availability, and market interpretation still require validation.

RONE - sculpted coverings that crown women with dignity.

RONE Reverence - preferred product definition

- One integrated modular piece, not a separate hat plus shawl.
- Pre-sculpted crown/head wrap with an attached short shoulder drape.
- The drape should cover the shoulders sufficiently for funerals and ceremonies but remain short enough not to overpower the dress.
- First version: matte black, restrained, dignified, and without obvious athletic detailing.
- Removable brooch; blackened metal, pewter, dark antique gold, or no hardware for funeral use.
- Hidden ventilation, anti-slip band, soft lining, adjustable fit, and room for braids, wigs, and natural hair.
- Church and traditional-ceremony versions can later add color, leteisi-inspired fabric, and group ordering.

IMPORTANT CORRECTION

- The earlier full-length shoulder cape was visually too dominant.
- The preferred direction is the shorter attached drape shown in the latest Reverence board.
- The product must complement what the woman is wearing, not become the entire outfit.

6. Decision register

Source of truth for future collaborators

LOCKED

- Keep the original five bucket-hat styles.
- Keep the initial modest-performance directions.
- Use the emblem-brooch as signature identity and functional hardware.
- Use the preferred tan hat as the fit/proportion reference for Hat Block 01.
- Derive Layered Safari and Air Sculpt from the approved block.
- RONE Reverence is one black integrated piece with a short shoulder-covering drape.

PROVISIONAL

- Final naming hierarchy and pronunciation.
- Exact crown depth, brim width, drape length, sizing, fabrics, and attachment methods.
- Brooch attachment technology and final hardware dimensions.

- Launch sequence beyond the first four prototypes.

PARKED OR REJECTED

- Generic logo-on-blank bucket hats.
- Overly futuristic silhouettes that ignore Gao's real preferences.
- The theatrical Velcro slit fins as a launch product; retain only as R&D.
- The very long Reverence drape that overpowers clothing.
- Oversized bright brooches or costume-like hardware.
- Any claim that later concepts replace the core five styles.

7. Manufacturing and prototype plan

Move from beautiful boards to verifiable product

1. Create EWAH Hat Block 01 from the preferred tan-hat proportions using an original pattern and fit process.
2. Develop the emblem-brooch with a specialist metal-hardware supplier in antique gold, blackened gunmetal, and pewter.
3. Prototype Sculpt Essential first to validate crown, brim, adjustability, and brooch scale.
4. Fit on Gao with glasses and multiple hair states: straight, natural, braids, low bun/ponytail, and wig volume.
5. Derive Layered Safari and Air Sculpt from the approved block.
6. Prototype RONE Reverence Short Drape as one integrated modular piece.
7. Run wear, wind, sweat, packability, hair-friction, corrosion, and drape-balance testing before expanding the collection.

Recommended first prototype set

PRIORITY	PROTOTYPE	PURPOSE
01	Sculpt Essential	Onyx foundation; validates the master block.
02	Layered Safari	Clay/sand lifestyle variant with tonal bands.
03	Air Sculpt	Onyx performance variant with ventilation and secure fit.
04	RONE Reverence Short Drape	Matte-black ceremonial one-piece for Botswana testing.

8. What Claude should do next

Do not restart the ideation phase

8. Draft the manufacturer-ready product brief and first tech-pack structure for EWAH Hat Block 01 / Sculpt Essential.
9. Create a dedicated emblem-brooch hardware specification: dimensions, materials, plating, attachment, pull testing, corrosion, snagging, and packaging.

10. Create the RONE Reverence Short Drape technical-development brief, clearly proving it is one integrated piece.
11. Write separate RFIs/RFQs for custom cut-and-sew headwear factories and custom metal-hardware suppliers.
12. Build a Botswana research guide for funeral, church, and traditional-ceremony users, including group-order behavior.
13. Create sample scorecards and revision logs.
14. Challenge manufacturability, cost, heat, comfort, cultural fit, and commercial logic without reducing the ideas to generic hats.

9. Copy/paste kickoff prompt for Claude

You are joining an ongoing strategic fashion-design and product-development project for EWAH. Treat the uploaded master handoff as the source of truth. Do not restart the concept, delete locked designs, or reduce the hats to generic logo-on-blank products. Distinguish clearly between LOCKED, PROVISIONAL, and REJECTED decisions. Preserve EWAH's sculpted architectural language, functional emblem-brooch, performance credibility, modesty, Botswana cultural context, and the real fit/proportion evidence from Gao's existing hats. Challenge weak ideas and manufacturability assumptions directly. Your next priority is to translate the approved Hat Block 01, emblem-brooch, and RONE Reverence Short Drape into realistic technical-development documents and a manufacturer-screening process.

Visual appendix 1: Core collection overview

Concept board. Use the written decision register as authoritative where AI-generated visual details conflict.

Visual appendix 2: Sculpt Bucket Hat

Concept board. Use the written decision register as authoritative where AI-generated visual details conflict.

Visual appendix 3: Mesh Flow Bucket Hat

Concept board. Use the written decision register as authoritative where AI-generated visual details conflict.

Visual appendix 4: Wrap Flow Bucket Hat

Concept board. Use the written decision register as authoritative where AI-generated visual details conflict.

Visual appendix 5: Pleat Motion Bucket Hat

Concept board. Use the written decision register as authoritative where AI-generated visual details conflict.

Visual appendix 6: Emblem-brooch collection and hardware roles

EWAH EMBLEM-BROOCH HAT COLLECTION

SCULPTED FOR MOVEMENT. MADE FOR FREEDOM.

THREE CONCEPTS. ONE SIGNATURE.

THE EWAH EMBLEM AS SECURITY, FUNCTION & STATEMENT.

CONCEPT SERIES

EMBLEM-BROOCH HAT CONCEPTS

01

NOOR LOCK PERFORMANCE HAT

TRAIN. MOVE. STAY SECURE.

Training-focused design with a secure inner fit and emblem anchor that locks the drape in place for high-performance movement.

- SECURE INNER FIT: Locks in place
- EMBLEM ANCHOR: Side anchor for drape stability
- BREATHABLE PANELS: Engineered airflow
- SWEAT-WICKING: Performance fabric
- BUILT FOR MOTION: Stable. Secure. Strong.

02

NOOR SHADE TRAVEL HAT

TRAVEL LIGHT. SHADE WELL.

Elegant sun protection with extended shade and soft drape for all-day sun comfort and effortless travel.

- EXTENDED SHADE: Sun protection
- NECK DRAPE: Soft coverage
- EMBLEM ANCHOR: Side anchor for adjustable drape
- PACKABLE & LIGHT: Travel-ready
- BREATHABLE LINING: Cool. Comfortable.

03

NOOR SCULPT WRAP HAT

SCULPTED. ELEVATED. DISTINCT.

A sculptural take on modest performance. Pleated wrap drape and refined emblem hardware create a bold, editorial silhouette.

- SCULPTURAL WRAP: Pleated detail
- SIGNATURE BROOCH: Statement hardware
- ADJUSTABLE DRAPE: Style your way
- PREMIUM FABRIC: Luxe feel
- MODULAR STYLING: Multiple looks

THE EWAH EMBLEM-BROOCH — FUNCTION MEETS SIGNATURE

More than an emblem. A precision detail that anchors, adjusts, and elevates.

A. REMOVABLE BROOCH

Wear it your way. Removable for styling variations and easy care.

B. FIXED SIDE ANCHOR

Secure by design. Stabilizes drape and keeps you locked in during movement.

C. BACK GATHER CLASP

Adjust and secure. Rear clasp gathers drape for a custom, stable fit.

- SECURITY: Engineered fit for confident movement.
- MOVEMENT: Stable design that moves with you.
- ADJUSTABLE DRAPE: Customize coverage and style.
- BREATHABLE LINING: Airflow where you need it most.
- MODULAR STYLING: Multiple looks. One signature piece.

MOISTURE-WICKING: Stay dry and comfortable.

LIGHTWEIGHT: Engineered for all-day wear.

SUN PROTECTION: UPF 50+ coverage for outdoor comfort.

PACKABLE: Easily packs flat for travel.

PERFORMANCE FABRIC: Soft, durable, and made to move.

SIGNATURE HARDWARE: EWAH emblem as function & identity.

SCULPTED FOR MOVEMENT • MADE FOR FREEDOM • DESIGNED FOR YOU

Visual appendix 11: Layered Safari - derived from the preferred tan hat block

EWAH
SCULPT • FLOW • FREEDOM

CONCEPT SERIES

LAYERED SAFARI

A refined evolution of the classic bucket hat — the EWAH Layered Safari blends soft structure with sculpted detailing for elevated everyday style and effortless sun protection.

-  **APPROVED BLOCK**
Medium-depth crown, gently downward brim for balanced coverage and flattering fit.
-  **LAYERED BANDS**
Two tonal layers add dimension and a signature EWAH touch.
-  **SOFT STRUCTURE**
Lightweight with a relaxed feel. Packs easily, wears beautifully.
-  **HIDDEN ADJUSTER**
Comfort fit with an internal adjuster for a secure, custom feel.
-  **TRAVEL + SUN COVERAGE**
Wide, protective brim shields from the sun without compromising style.

  **CLAY TAN / SAND**
TONAL LAYERS + ANTIQUE GOLD EMBLEM

APPROVED BLOCK REFERENCE

INSPIRED BY EVERYDAY. DESIGNED FOR FREEDOM.

PRODUCT VIEWS

-  **MOISTURE-WICKING**
Stay dry and comfortable.
-  **LIGHTWEIGHT**
Engineered for all-day wear.
-  **PACKABLE**
Easily packs flat for travel.
-  **SUN PROTECTION**
UPF 50+ coverage for outdoor comfort.
-  **PERFORMANCE FABRIC**
Soft, durable, and made to move.
-  **SIGNATURE HARDWARE**
EWAH emblem as function & identity.

SCULPTED FOR MOVEMENT • MADE FOR FREEDOM • DESIGNED FOR YOU

Visual appendix 12: R&D only - boundary-pushed slit system

STATUS: PARKED / EXPERIMENTAL

- This board is included to preserve the exploration, not as an approved launch design.

Concept board. Use the written decision register as authoritative where AI-generated visual details conflict.

Visual appendix 13: R&D only - softer slit transformation study

STATUS: PARKED / EXPERIMENTAL

- This board is included to preserve the exploration, not as an approved launch design.

Concept board. Use the written decision register as authoritative where AI-generated visual details conflict.

Visual appendix 14: Reverence full-drape exploration - later judged too long

STATUS: SUPERSEDED

- Useful concept evidence, but the length was rejected because it overpowered the outfit.

Concept board. Use the written decision register as authoritative where AI-generated visual details conflict.

Visual appendix 15: Reverence short-drape direction - preferred base

STATUS: PREFERRED CEREMONIAL DIRECTION

- One modular piece with a shorter shoulder-covering drape.

Concept board. Use the written decision register as authoritative where AI-generated visual details conflict.
